

## Wastewater/Water Technician

### Description of Work:

Employees will perform a variety of skilled, semi-skilled and unskilled labor tasks in the maintenance, operation, and repair of water and sewer lines and appurtenances, Grade 2 Biological Wastewater Treatment Plant, and sewer lift stations. Work involves operating a variety of tools and equipment to repair and replace sections of water and sewer lines and pumps as well as operating and maintaining the wastewater treatment plant. Work includes mowing grass, spraying, etc. to maintain right of ways and grounds surrounding treatment plant and lift stations. Employees are also subject to on-call and call-back work.

### Minimum Training and Experience Requirements:

Graduation from high school and some experience in semi-skilled maintenance or construction work which provides the required knowledge, skills, and abilities.

### Special Requirements:

- Possession and maintenance of a valid North Carolina driver's license
- Willingness and ability to successfully obtain the required grade level water distribution certification required by the State for the County's water system
- Willingness and ability to successfully obtain the required grade level collections certification required by the State for the County's sewer system
- Willingness and ability to successfully obtain the required grade level biological wastewater certification required by the State for the County's sewer system

### Desired Qualifications: (to possess or be willing to obtain)

- Grade B Water Distribution Certification
- Cross Connection & Backflow Certification
- Grade II Biological Wastewater Certification
- Grade I Wastewater Collections Certification

Pay based on experience and certification
